ERADICATION OF POVERTY

IN MY TOWN

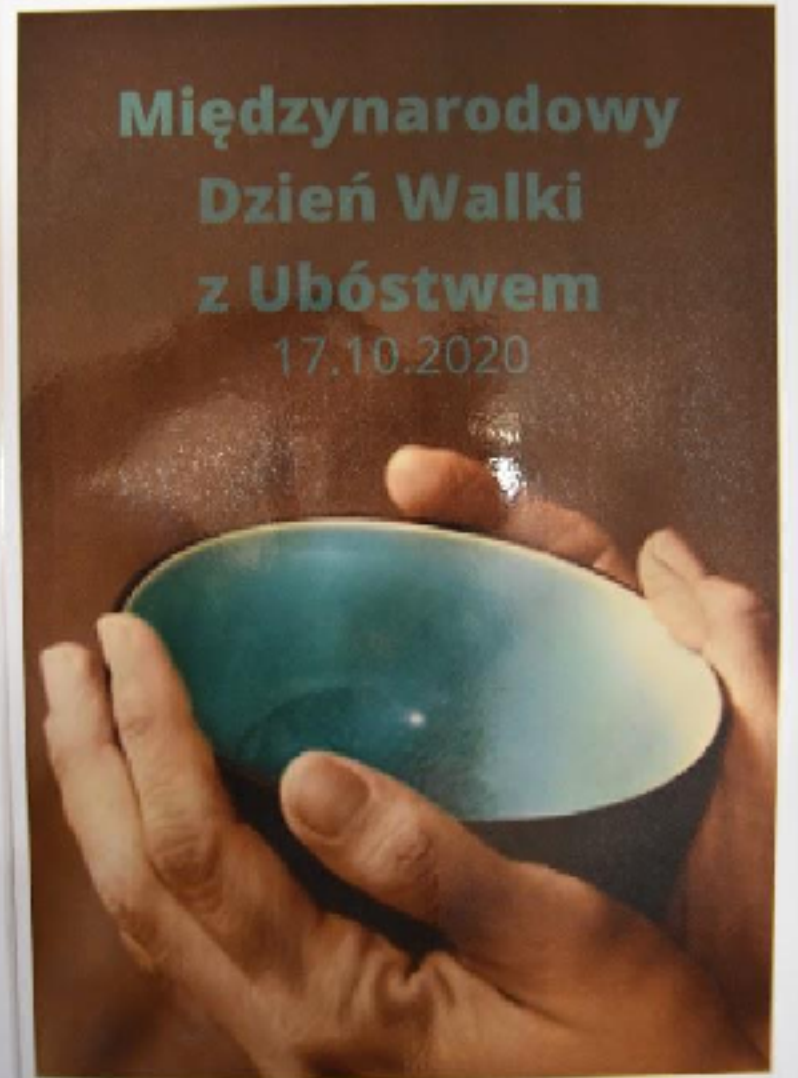

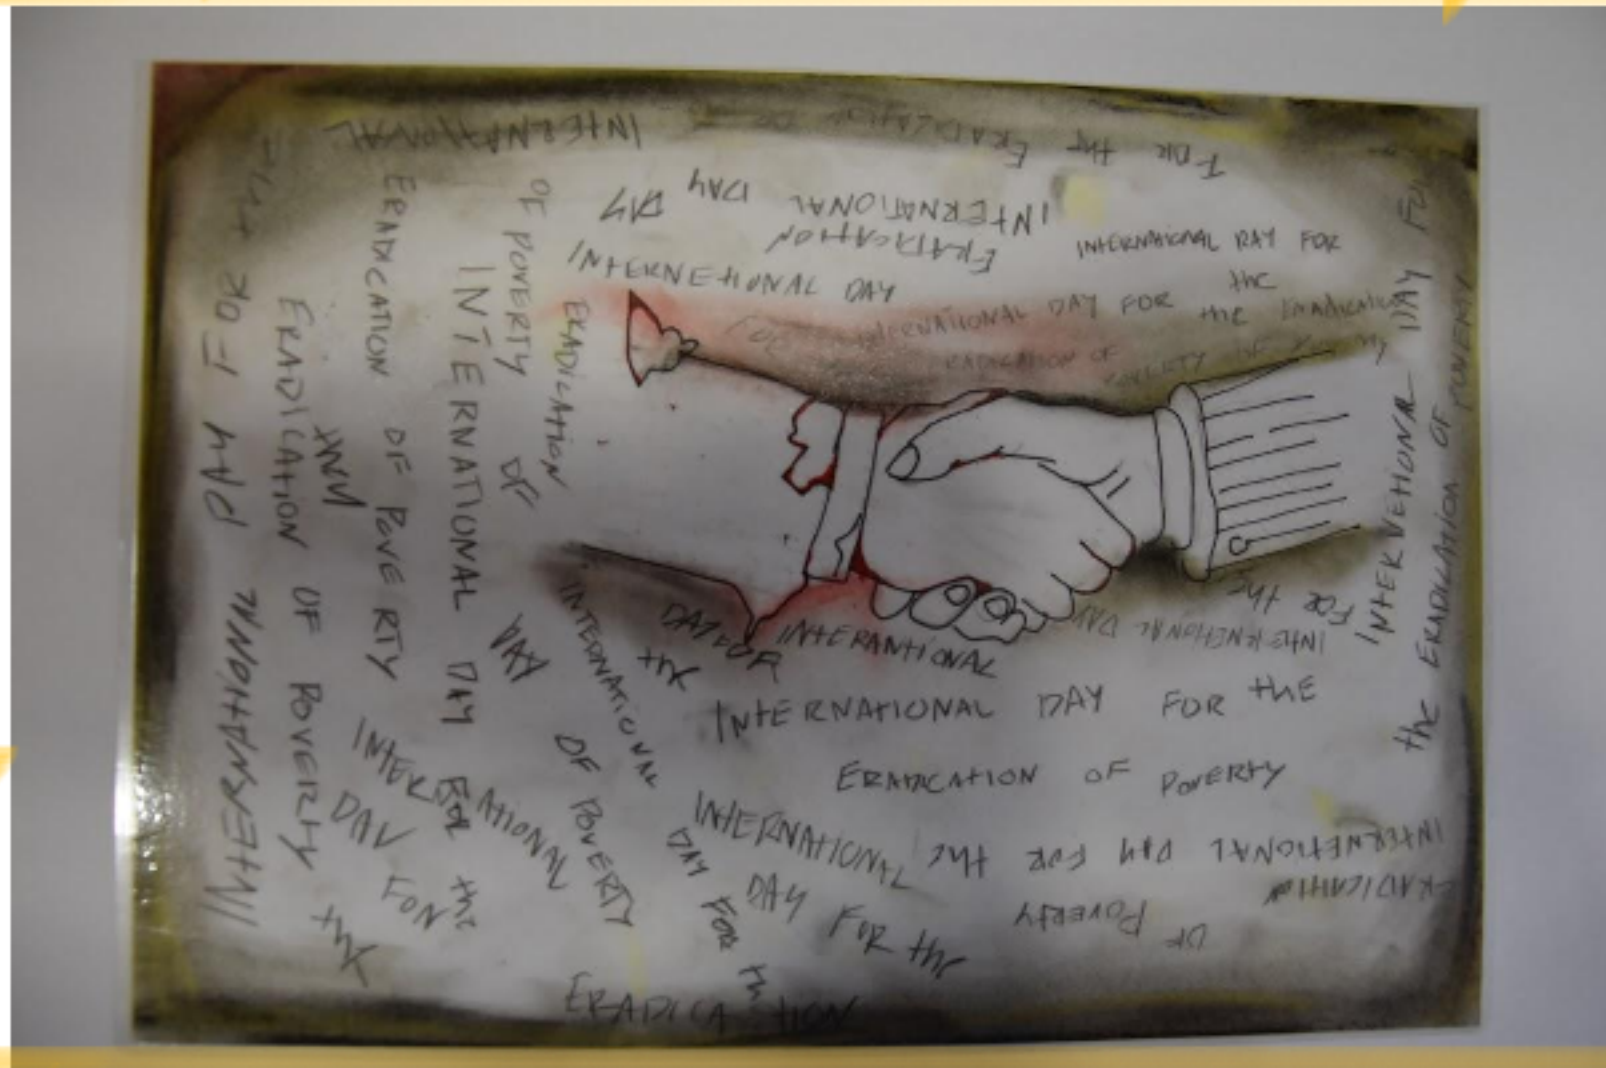

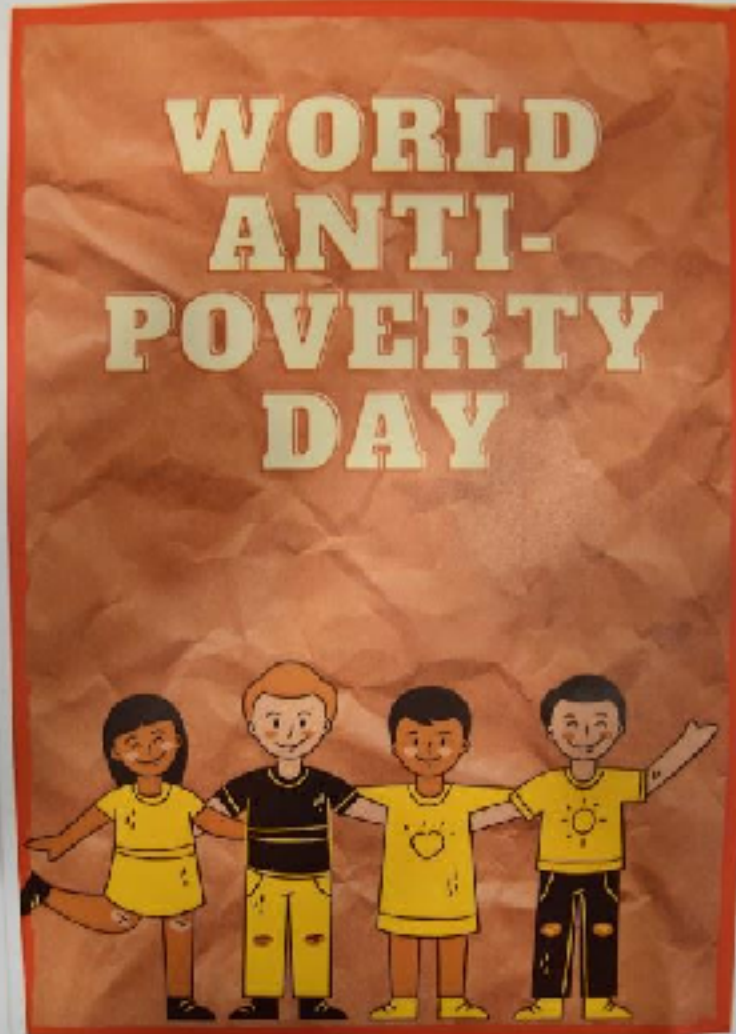

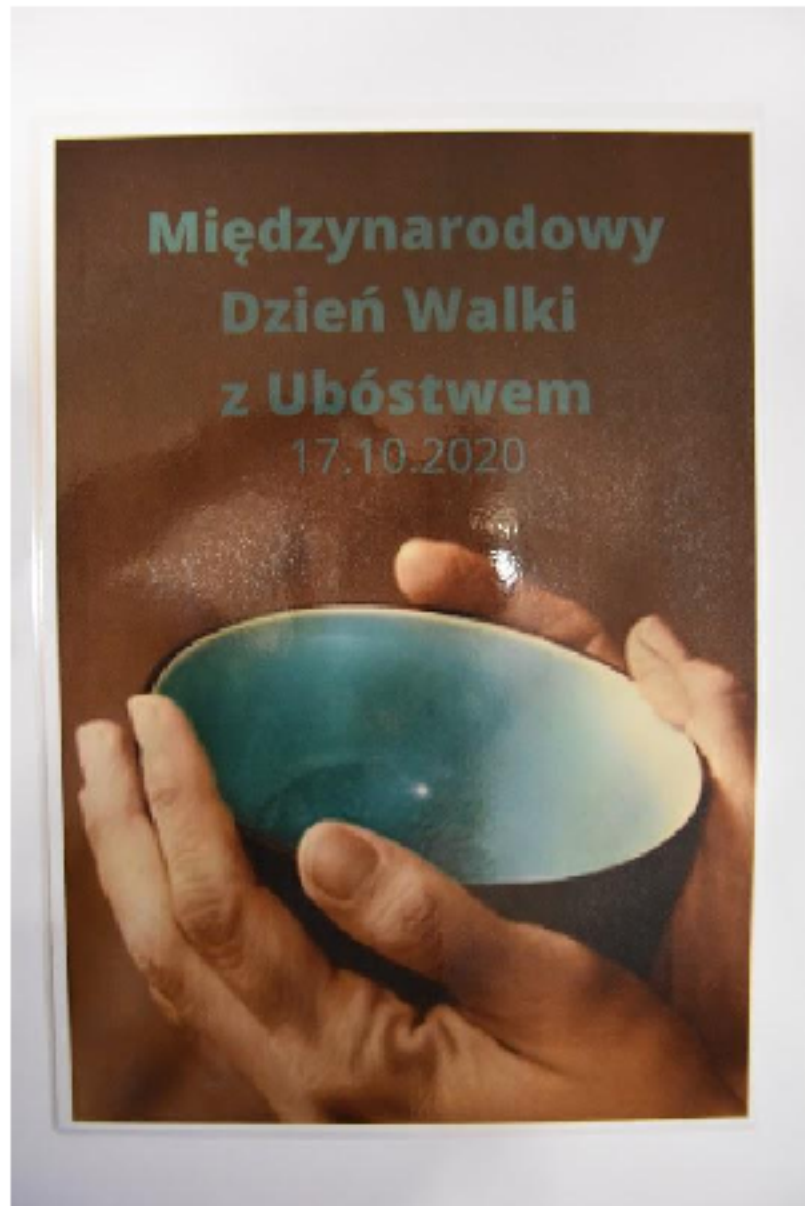

Due to the coronavirus pandemic, which broke out in Italy at the end of February, in 2020 there will be an increase in poverty in Italy. This is the alert launched by the consumer associations after the poverty data communicated today by Istat which found almost 1.7 million families in absolute poverty with an incidence of 6.4% in 2019 (7 % in 2018), for a total number of almost 4.6 million individuals. Data already appears old.
